Appendix 10

Specification of Width, Height and Color of Characters for Vessel Markings

I. Chinese Vessel Name

1. Height Standard of Characters	
GT of Vessel	Minimum Length
20 GT and above and less than 100 GT	25 cm
100 GT and above and less than 1,000 GT	30 cm
1,000 GT and above	35 cm
2. Color of Characters	
Ground Color of Fishing Vessel	Color of Characters
Dark Color	White
Bright Color	Black

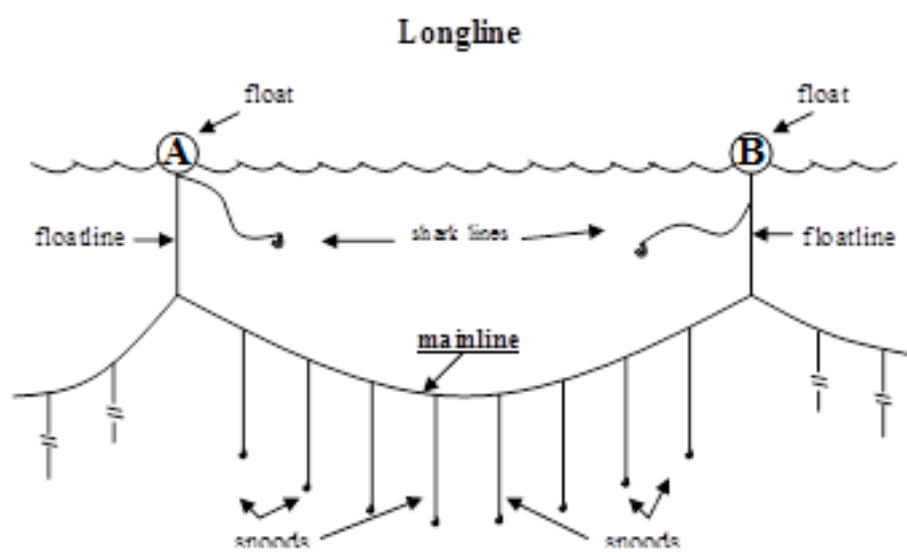

II. English Vessel Name and CT Number

1. Height Standard of Characters	
GT of Vessel	Minimum Length
20 GT and above and less than 100 GT	15 cm
100 GT and above and less than 1,000 GT	20 cm
1,000 GT and above	25 cm
2. Color of Characters	
Ground Color of Fishing Vessel	Color of Characters
Dark Color	White
Bright Color	Black

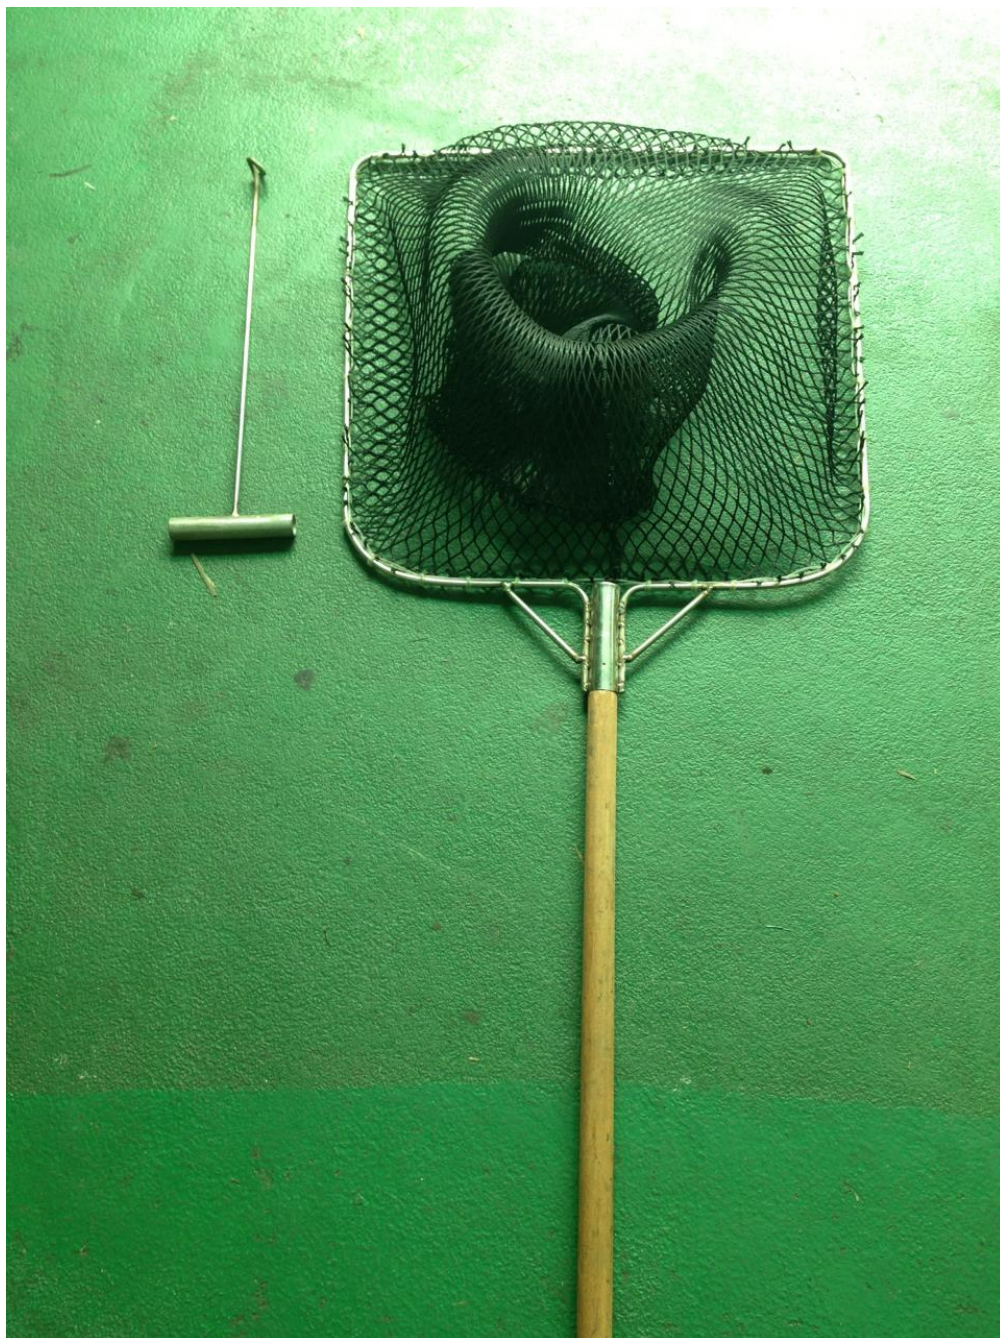

III. IRCS

1. Height Standard of Characters		
Position of Marking	Vessel Length Overall	Minimum Length
Both Sides of the Vessel	25 meters and above	1 meter
	20 meters and above and less than 25 meters	80 cm
	15 meters and above and less than 20 meters	60 cm
	12 meters and above and less than 15 meters	40 cm
	5 meters and above and less than 12 meters	30 cm
	Less than 5 meters	10 cm
Deck	5 meters and above	30 cm
2. Width Standard		
Marking Items		The Proportion of Marking Items to the Height
Width of Hyphen		Half
Stroke Width of Characters or Hyphen		One-sixth
Space between Characters		One-sixth and above and less than one-fourth
Adjacent Space of Characters with Hypotenuse Form (such as A, V)		One-tenth and above and less than one-eighth
3. Color of Characters		
Ground Color of Fishing Vessel		Color of Characters
Dark Color		White
Bright Color		Black

Appendix 11 Figure of Shark Line

Appendix 12 De-hooker (left) and Scoop net (right)

Appendix 13

Specification of Seabirds Mitigation Measures in the WCPFC Convention Area

1. Tori lines (South of 30° South)

1a) For vessels ≥ 35 m total length

- i. Deploy at least 1 tori line. Where practical, vessels are encouraged to use a second tori line at times of high bird abundance or activity; both tori lines shall be deployed simultaneously, one on each side of the line being set. If two tori lines are used, baited hooks shall be deployed within the area bounded by the two tori lines.
- ii. A tori line using long and short streamers shall be used. Streamers shall be: brightly coloured, a mix of long and short streamers.
 - a. Long streamers shall be placed at intervals of no more than 5m, and long streamers must be attached to the line with swivels that prevent streamers from wrapping around the line. Long streamers of sufficient length to reach the sea surface in calm conditions must be used.
 - b. Short streamers (greater than 1m in length) shall be placed no more than 1m apart.
- iii. Vessels shall deploy the tori line to achieve a desired aerial extent greater than or equal to 100m. To achieve this aerial extent the tori line shall have a minimum length of 200m, and shall be attached to a tori pole >7 m above the sea surface located as close to the stern as practical.
- iv. If vessels use only one tori line, the tori line shall be deployed windward of sinking baits.

1b) For vessels <35 m total length

- i. A single tori line using either long and short streamers, or short streamers only shall be used.
- ii. Streamers shall be: brightly coloured long and/or short (but greater than 1m in length) streamers must be used and placed at intervals as follows:
 - a. Long streamers placed at intervals of no more than 5m for the first 75 m of tori line.
 - b. Short streamers placed at intervals of no more than 1m.
- iii. Long streamers should be attached to the line in a way that prevent streamers from wrapping around the line. All long streamers shall reach the sea-surface in calm conditions. Streamers may be modified over the first 15 m to avoid tangling.
- iv. Vessels shall deploy the tori line to achieve a minimum aerial extent of 75 m. To achieve this aerial extent the tori line shall be attached to a tori pole >6 m above the sea surface located as close to the stern as practical. Sufficient drag must be created to maximise aerial extent and maintain the line directly behind the vessel during crosswinds. To avoid tangling, this is best achieved using a long in-water section of rope or monofilament.

- v. If two tori lines are used, the two lines must be deployed on opposing sides of the main line.

2. Tori lines (North of 23° North)

2a) Long Streamer

- i. Minimum length: 100 m
- ii. Must be attached to the vessel such that it is suspended from a point a minimum of 5m above the water at the stern on the windward side of the point where the hookline enters the water.
- iii. Must be attached so that the aerial extent is maintained over the sinking baited hooks.
- iv. Streamers must be less than 5m apart, be using swivels and long enough so that they are as close to the water as possible.
- v. If two (i.e. paired) tori lines are used, the two lines must be deployed on opposing sides of the main line.

2b) Short Streamer

- i. Must be attached to the vessel such that it is suspended from a point a minimum of 5m above the water at the stern on the windward side of a point where the hookline enters the water.
- ii. Must be attached so that the aerial extent is maintained over the sinking baited hooks.
- iii. Streamers must be less than 1m apart and be 30 cm minimum length.
- iv. If two (i.e. paired) tori lines are used, the two lines must be deployed on opposing sides of the main line.

3. Side setting with bird curtain and weighted branch lines

- i. Mainline deployed from port or starboard side as far from stern as practicable (at least 1m), and if mainline shooter is used, must be mounted at least 1m forward of the stern.
- ii. When seabirds are present the gear must ensure mainline is deployed slack so that baited hooks remain submerged.
- iii. Bird curtain must be employed:
 - Pole aft of line shooter at least 3m long;
 - Minimum of 3 main streamers attached to upper 2m of pole;
 - Main streamer diameter minimum 20mm;
 - Branch streamers attached to end of each main streamer long enough to drag on water (no wind) – minimum diameter 10mm.

4. Night setting

- i. No setting between nautical dawn and before nautical dusk.
- ii. Nautical dusk and nautical dawn are defined as set out in the Nautical Almanac tables for relevant latitude, local time and date.

- iii. Deck lighting to be kept to a minimum. Minimum deck lighting should not breach minimum standards for safety and navigation.

5. Weighted branch lines

- i. Following minimum weight specifications are required:
 - one weight greater than or equal to 40g within 50cm of the hook; or
 - greater than or equal to a total of 45g attached to within 1 m of the hook; or
 - greater than or equal to a total of 60g attached to within 3.5 m of the hook; or
 - greater than or equal to a total of 98g weight attached to within 4 m of the hook.

6. Management of offal discharge

- i. Either no offal discharge during setting or hauling;
- ii. Or strategic offal discharge from the opposite side of the boat to setting/hauling to actively encourage birds away from baited hooks.

7. Blue-dyed bait

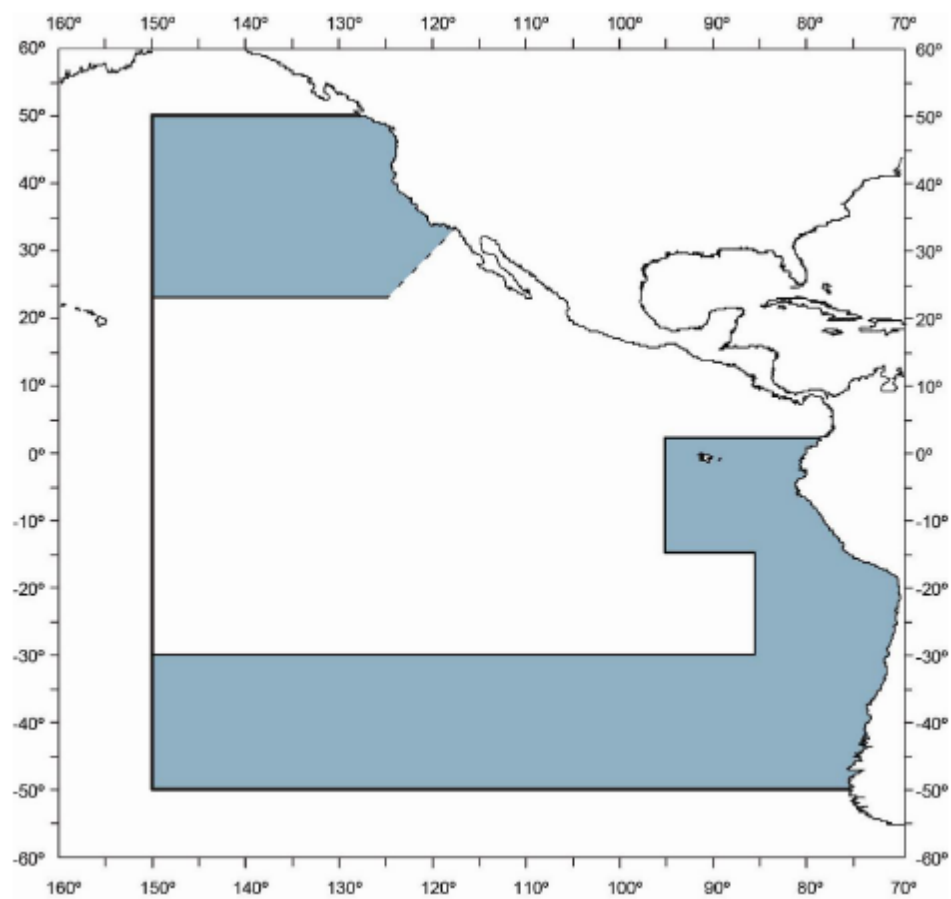

- i. If using blue-dyed bait it must be fully thawed when dyed.
- ii. The Commission Secretariat shall distribute a standardized colour placard.
- iii. All bait must be dyed to the shade shown in the placard.

8. Deep setting line shooter

Line shooters must be deployed in a manner such that the hooks are set substantially deeper than they would be lacking the use of the line shooter, and such that the majority of hooks reach depths of at least 100 m.

Appendix 14

Areas to Use Seabird Mitigation Measures in the IATTC Convention Area

Appendix 15

Specifications for Seabird Mitigation Measures in the IATTC Convention Area

1.a. Tori lines

- i. Minimum length: 100 m
- ii. Must be attached to the vessel such that it is suspended from a point a minimum of 5 m above the water at the stern on the windward side of the point where the hookline enters the water.
- iii. Must be attached so that the aerial extent is maintained over the sinking baited hooks.
- iv. Streamers must be less than 5m apart, be using swivels and long enough so that they are as close to the water as possible.
- v. If the tori line is less than 150 m in length, must have a towed object attached to the end so that the aerial extent is maintained over the sinking baited hooks.
- vi. If two (i.e. paired) tori lines are used, the two lines must be deployed on opposing sides of the main line.

1.b. Tori line (light streamer)

- i. Minimum length of tori line: 100 m or three times the total length of the vessel.
- ii. Must be attached to the vessel such that it is suspended from a point a minimum of 5 m above the water at the stern on the windward side of a point where the hookline enters the water.
- iii. Must be attached so that the aerial extent is maintained over the sinking baited hooks.
- iv. Streamers must be less than 1m apart and be 30 cm in minimum length.
- v. If two (i.e. paired) tori lines are used, the two lines must be deployed on opposing sides of the main line.

2. Night setting

- i. No setting between local sunrise and one hour after local sunset.
- ii. Deck lighting to be kept to a minimum, noting requirements for safety and navigation.

3. Weighted branch lines

- i. Following minimum weight specifications are required:
- ii. Minimum weights attached to all branch lines is 45 g, with the following options:
 - less than 60 g weight attached to within 1 m of the hook; or
 - greater than 60 g and less than 98 g weight attached to within 3.5 ms of the hook; or
 - greater than 98 g weight attached to within 4 m of the hook.

4. Blue dyed bait

- i. The IATTC Secretariat shall distribute a standardized color placard.
- ii. All bait must be dyed to the shade shown in the placard.

5. Management of offal discharge

- No offal discharge during setting or hauling; or
- Strategic offal discharge from the opposite side of the boat to setting/hauling to actively encourage birds away from baited hooks.

*** Codes for Discard Reasons :**

“Unfit for human consumption” is defined as the follows:

Code 1: is meshed or crushed in the purse seine net;

Code 2: is damaged due to shark or whale depredation; or

Code 3: has died and spoiled in the net where a gear failure has prevented both the normal retrieval of the net and catch and efforts to release the fish alive.

The final set of a trip:

Code 4: is insufficient well space to accommodate all fish caught in that set. For Code 4, a statement that no further fishing will be undertaken until the catch on board has been unloaded shall be made in the “Notes” column.

Malfunction of fishing vessel equipment:

Code 5: serious malfunction of equipment occurs.

“Unfit for human consumption” does not include fish that

- i. is considered undesirable in terms of size, marketability, or species composition; or
- ii. is spoiled or contaminated as the result of an act or omission of the crew of the fishing vessel.

I have confirmed the above-mentioned information and will receive a copy of the notification Signature of Observer : _____

Appendix 29

Report on Incidental Catch by Purse Seine Fishing Vessels

Vessel Name		Registration No.	CT —
Time and Date of Set	Date: mm dd yy Time: hh mm	Location of Set	Longitude: Deg. Min. (E/W) Latitude: Deg. Min. (N/S)
Steps taken to ensure safe release	<input type="checkbox"/> Stop net roll <input type="checkbox"/> Stop fishing operation <input type="checkbox"/> Other_____		
Species and number of incidental catch	<input type="checkbox"/> Whale: species name_____, number of catch ____; species name_____, number of catch ____; species name_____, number of catch ____		
	<input type="checkbox"/> Dolphin: species name_____, number of catch____; species name_____, number of catch____; species name_____, number of catch____		
	<input type="checkbox"/> Whale Shark: number of catch_____		
	<input type="checkbox"/> Sea turtle: species name_____, number of catch____; species name_____, number of catch____; species name_____, number of catch____		
	<input type="checkbox"/> Other: species name_____, number of catch____; species name_____, number of catch____; species name_____, number of catch____		
Details on the species caught incidentally (if known)		Life status after release	<input type="checkbox"/> Alive; <input type="checkbox"/> Dead

Appendix 30 The conversion factors between the weights of processed fish and round fish

Formula: round weight =
the weight of processed fish × the conversion factor

Species	Processing Types	Conversion factors
Bigeye tuna	Gilled and gutted (GG)	1.14
	Headed and gutted (DR)	1.23
Yellowfin tuna	Gilled and gutted (GG)	1.11
	Headed and gutted (DR)	1.23
Swordfish	Gilled and gutted (GG)	1.14
	Headed and gutted (DR)	1.21
Blue marlin	Headed and gutted (DR)	1.15
Striped marlin	Headed and gutted (DR)	1.26
Bluefin tuna	Gilled and gutted (GG)	1.16
Sharks	Headed and gutted (DR)	1.54
	Headed, gutted, retained both fin and trunk	2.40
